Kobi

KP2: Build Tracking & Gap Resolution Document

- Updated last: December 2025

Overview

This document defines the implementation requirements, current vs expected gaps, and sign-off structure for the onboarding, authentication, feed, notifications, and settings flows in the KP2 mobile app (iOS & Android).

The goal is to:

- Bring the builds in line with Figma designs, UX copy, and content constraints.
- Ensure functional correctness (validation, algorithms, flows, state handling).
- Provide clear mapping for ADO items, QA reviews, and sign-offs across PMs, Engineering, and Leadership.

---

1. Onboarding Page

ID	Feature / Flow	Item / Element	Current Behavior / Issue	Expected Behavior / Requirement	ADO Tasks (Link Relevant Tasks)	Sign-off Team (ENG, PM, LT)	Milestone #	Status & Build #	Note
ONB-1	Onboarding Page	“Your every day” animation	Animation does not load/play as in design	Match Figma animation behavior for “Your every day” sequence					
ONB-2	Onboarding Page	“day pal” spacing	Space appears between “day” and “pal” before “kobi” appears	No space between “day” and “pal” until “kobi” is visible; transition should feel natural/continuous					
ONB-3	Onboarding Page	“Kobi pal” transition	“Kobi pal” from “Your every day” page does not slide up to final page next to chat logo	“Kobi pal” text should smoothly slide up into final screen and sit next to chat logo as in design					
ONB-4	Onboarding Page (iOS)	iPhone 11 animation	Touching animation/spacing inconsistent on	Ensure onboarding screens are fully responsive;					View other platfor

		and spacing	iPhone 11; unclear if responsive	smaller screen devices including iPhone 11 should match Figma spacing, proportions, and animation pacing					in smal devices e.g. Instagr

---

2. Sign Up Flow (Overall)

ID	Feature / Flow	Item / Element	Current Behavior / Issue	Expected Behavior / Requirement	ADO Tasks (Link Relevant Tasks)	Sign-off Team (ENG, PM, LT)	Milestone #	Status & Build #	Notes
SU-1	Sign Up Flow	Flow order	Flow order not aligned with updated spec	Updated flow: **Email → Confirm OTP → Verify Email → Enter Account Info / Complete Profile → Select Interests → Add Profile Picture**					
SU-2	Sign Up Flow	Tracking consent (iOS)	iOS requires tracking; unclear if page exists or how it's handled	Implement tracking/permissions page for iOS (and Android if needed) to request consent for personalized experience					Verify if Android also needs similar messaging
SU-3	Sign Up Flow	Tracking copy	Benefits text for tracking not implemented	Include copy: "Allows a more personalized experience", "See more items you may find interesting", "You can change this preference any time"					
SU-4	Sign Up Flow	Progress bar	Progress bar usage inconsistent with design	Use top progress bar across onboarding / sign up as in Figma					

3. Create Account / Complete Profile

Note: This page will become **"Complete Profile"** under the new flow, with email removed.

3.1 Name Fields

ID	Feature / Flow	Item / Element	Current Behavior / Issue	Expected Behavior / Requirement	ADO Tasks (Link Relevant Tasks)	Sign-off Team (ENG, PM, LT)	Milestone #	Status & Build #	Notes
ACC-1	Complete Profile	First Name / Last Name validation	Validation rules and error text not fully implemented	Min 3 / Max 20 characters each; allowed: letters, spaces, hyphens. Error text: "Minimum 3 characters. Letters, spaces, or hyphens only."					
ACC-2	Complete Profile	Last Name label text	Currently "Last name"	Label must be "Last Name" (capital N)					

3.2 Account Use Question

ID	Feature / Flow	Item / Element	Current Behavior / Issue	Expected Behavior / Requirement	ADO Tasks (Link Relevant Tasks)	Sign-off Team (ENG, PM, LT)	Milestone #	Status & Build #	Notes
ACC-3	Complete Profile	"What will you most likely be using this account for"	Text size and container sizing inconsistent with other fields	Match font size to other questions; make container height/width consistent with Gender box if needed, per design					

3.3 Location

ID	Feature / Flow	Item / Element	Current Behavior / Issue	Expected Behavior / Requirement	ADO Tasks (Link Tasks)	Sign-off Team	Milestone #	Status & Build #	Notes
ACC-4	Complete Profile	Location label	Label text inconsistent currently "location" (may not be exact "Location")	Label must be exactly **"Location"**					
ACC-5	Complete Profile	Location icon	Icon missing	Add location icon as per Figma					
ACC-6	Complete Profile	Location API behavior	API not working as expected; not restricted to state + country	Location should be limited to state + country; display as "State, Country" for any region					Confirm if this would be easier if state and country are separate fields?
ACC-7	Complete Profile	Typing / suggestions	Locations entered not showing clearly while typing	As user types, show suggestions and keep typed text visible;					

3.4 Gender

ID	Feature / Flow	Item / Element	Current Behavior / Issue	Expected Behavior / Requirement	ADO Tasks (Link Tasks)	Sign-off Team	Milestone #	Status & Build #	Notes
ACC-8	Complete Profile	"Gender" label font	Currently using Rubik Medium	Use **Rubik Regular** font for "Gender" label					
ACC-9	Complete Profile	Gender options text color	Male/Female/Other not using same color as other text	Use **#717182** for gender option labels, matching other text in design					

3.5 Password

ID	Feature / Flow	Item / Element	Current Behavior / Issue	Expected Behavior / Requirement	ADO Tasks (Link Relevant Tasks)	Sign-off Team (ENG, PM, LT)	Milestone #	Status & Build #	Notes
ACC-10	Complete Profile	Password hint line	Password requirements hint not appearing when user types	Show inline password requirements once user starts typing (not before)					
ACC-11	Complete Profile	Password validation	Requirements (mixed character types, length) not fully implemented	Enforce: min 8 characters; mix of uppercase + lowercase (and any other defined rules)					
ACC-12	Complete Profile	Confirm password match indicator	Second password field not showing check mark when requirements met and matched	Display a check mark when second password matches first **and** all password rules are satisfied					
ACC-13	Complete Profile	Password mismatch error	No clear hint/error when passwords don't match	Show clear hint/error message when mismatch; prevent submission					
ACC-14	Complete Profile								

3.6 Username

ID	Feature / Flow	Item / Element	Current Behavior / Issue	Expected Behavior / Requirement (per User Content Guidelines & Constraints)	ADO Tasks (Link Relevant Tasks)	Sign-off Team (ENG, PM, LT)	Milestone #	Status & Build #	Notes
ACC-15	Complete Profile	Username constraints	Length and validation rules not fully implemented	Enforce all username rules: too short (≥4 chars), too long (≤15 chars),					Use User Content Guidelines & Constraint document

				allowed chars (letters, numbers, underscores), must start with letter, can't end with underscore, no consecutive underscores, unique (not taken)					
ACC-16	Complete Profile	Username hint/error copy	Hint/error messages not aligned or missing	Use exact messages: • Too short: "Username must be at least 4 characters." • Too long: "Username can't be longer than 15 characters." • Invalid char: "Only letters, numbers, and underscores are allowed." • Starts with non-letter: "Username must start with a letter." • Ends with underscore: "Username can't end with an underscore." • Double/triple underscores: "No consecutive underscores." • Already taken: "That username is already taken"					

3.7 Birthday

ID	Feature / Flow	Item / Element	Current Behavior / Issue	Expected Behavior / Requirement	ADO Tasks (Link Relevant Tasks)	Sign-off Team (ENG, PM, LT)	Milestone #	Status & Build #	Notes
ACC-17	Complete Profile	Date picker default	Date picker does not start on current date	Date picker should open on **current date**					
ACC-18	Complete Profile	18+ restriction	Age restriction not implemented	Enforce **18+**; show appropriate hint/error if underage (final copy to be confirmed)					

3.8 Policies Checkbox

ID	Feature / Flow	Item / Element	Current Behavior / Issue	Expected Behavior / Requirement	ADO Tasks (Link Relevant Tasks)	Sign-off Team (ENG, PM, LT)	Milestone #	Status & Build #	Notes
ACC-19	Complete Profile	Policy pages link	Policy pages not fully wired	Checkbox should link to full policy pages (Terms, Privacy)					Can be done when website live.
ACC-20	Complete Profile	Checkbox tap target	Difficult to tap	Increase hit area to meet accessibility standards					
ACC-21	Complete Profile								

3.9 Select Your Interests

ID	Feature / Flow	Item / Element	Current Behavior / Issue	Expected Behavior / Requirement	ADO Tasks (Link Relevant Tasks)	Sign-off Team (ENG, PM, LT)	Milestone #	Status & Build #	Notes
ACC-22	Select Interests	"Detty December" category	Still shown as "Detty December"	Change text to **"Seasonal Fun"**					

ACC-23	Select Interests	Font / shadow	Text font & shadow heavier than design	Match font, size, and shadow with Figma					
ACC-24	Select Interests	Hint label punctuation	Missing colon	Use: “Select topics you'd like to see:” (with colon)					

3.10 Confirm OTP (Sign Up)

ID	Feature / Flow	Item / Element	Current Behavior / Issue	Expected Behavior / Requirement	ADO Tasks (Link Relevant Tasks)	Sign-off Team (ENG, PM, LT)	Milestone #	Status & Build #	Notes
ACC-25	Confirm OTP	Editing digits	User can’t remove digits via backspace or tap	Allow backspace on last non-empty field; allow tapping individual boxes to edit; standard OTP UX					
ACC-26	Confirm OTP	Back navigation	No way to go back to email page	Add back/close control to return to email page in updated flow, use design					
ACC-27	Confirm OTP	Email masking/copy	Shows partially masked email and has grammar error (“send”)	Show full email: “Code has been sent to johnx@gmail.com” (no masking) and fix verb tense					

3.11 Add Profile Picture

ID	Feature / Flow	Item / Element	Current Behavior / Issue	Expected Behavior / Requirement	ADO Tasks (Link Relevant Tasks)	Sign-off Team (ENG, PM, LT)	Milestone #	Status & Build #	Notes
ACC-28	Add Profile Picture	Heading & copy	Text incorrect and not same weight as Figma	Match Figma heading and description text & font weight					
ACC-29	Add Profile Picture	Text container	Description “Choose a clear photo	Resize container so copy fits					

			where your face is visible. You can update this anytime in your account settings." squeezed into narrow box	comfortably per design					
ACC-30	Add Profile Picture	Navigation back	No back to Interests using new flow	Add back button to return to "Select Interests" per design					
ACC-31	Add Profile Picture	Button shapes	Buttons not same shape as rest of onboarding	Ensure buttons use same corner radius, and style, design in Figma					

3.12 Shared "Others in Create Account and Login"

ID	Feature / Flow	Item / Element	Current Behavior / Issue	Expected Behavior / Requirement	ADO Tasks (Link Relevant Tasks)	Sign-off Team (ENG, PM, LT)	Milestone #	Status & Build #	Notes
ACC-32	Complete Profile	Page name	Still titled "Create Account"; email present	Rename to **"Complete Profile"**; remove email field (handled earlier in flow)					Applies to sign up journey
ACC-33	Complete Profile / Login	"Already/Don't have" copy	Missing "an"; inconsistent formatting and alignment	Use exact copy: "Already have an account? Sign In" and "Don't have an account? Sign Up"; ensure font, size, and alignment match					Applies to Create Account & Login
ACC-34	Complete Profile	Error messaging on sign up	Sign up button not highlighted; no clear error when fields missing/invalid; user sees checkmarks for submission fields but no	Sign up button should allow click; on submit show specific error messages indicating which fields are missing/invalid,					

			clarity on why can't submit	e.g. incomplete email					
ACC-35	Complete Profile	Email validation	Incomplete email (e.g. missing ".com") not clearly handled	Implement robust email validation logic and user-facing hints					Error should show for UX.
ACC-36	Complete Profile	Field icons	Icons for each submission field differ from Figma	Use same icons as in Figma for all input fields					
ACC-37	Complete Profile	Fonts	Using Inter instead of Rubik (e.g., "Create Account")	Replace fonts with **Rubik** across Create/Complete Profile					
ACC-38	iPhone 11	Layout & text size	Text and screens much larger vs other devices in smaller screens - iPhone 11	Ensure responsive behavior; adjust scaling and typography on iPhone 11					
ACC-39	Email Templates	"Pal" vs "pay"	Email template still uses "pay"	Update all relevant email templates to **"Pal"** **and** **"KOBI PY LTD"**					

4. Login Flow

4.1 Login Page

ID	Feature / Flow	Item / Element	Current Behavior / Issue	Expected Behavior / Requirement	ADO Tasks (Link Relevant Tasks)	Sign-off Team (ENG, PM, LT)	Milestone #	Status & Build #	Notes
LOG-1	Login	Email field label	Shows placeholder like "anthoy@mail.com" instead of "Email"	Label should be **"Email"**; placeholder should follow design					

LOG -2	Login	Icons (email, password, eye)	Using wrong icons vs Figma	Use Figma icons for email, password, and show/hide eye					
LOG -3	Login	“Remember me” behavior	“Remember me” does not work	Implement proper “Remember me” logic for session persistence					

4.2 Forgot Password

ID	Feature / Flow	Item / Element	Current Behavior / Issue	Expected Behavior / Requirement	ADO Tasks (Link Relevant Tasks)	Sign-off Team (ENG, PM, LT)	Milestone #	Status & Build #	Notes
LOG -4	Forgot Password	OTP length	4-digit OTP being used	Use **6-digit OTP**, same as sign up					
LOG -5	Forgot Password	Exit OTP page	No way to exit OTP page	Add proper logic and UX to exit OTP					
LOG -6	Forgot Password	Editing digits	Backspace/tap editing not working smoothly	Same as sign up: allow easy edit of digits					
LOG -7	Forgot Password	Email icon	Icon not same as design	Use Figma email icon					
LOG -8	Forgot Password	Text: “Please nearer ..”	Copy is wrong and missing period	Correct to full, clear sentence with period (final copy to be confirmed)					
LOG -9	Forgot Password	Navigation back to Login	No way back to Login page	Provide back navigation to Login					
LOG -10	Forgot Password	Email template branding	Using “pay” instead of “Pa”	Update template to “Pa”; include text like “Someone sent a verification code to this email for xyz. If this is you, enter ...”					

LOG-11	Forgot Password	Error for unknown email	No error message when email not in system	Add error: “This didn’t work. You can create a new account or check email address and try again.”					

4.3 “Others in Create Account and Login”

Items ACC-33–ACC-39 also apply here.

ID	Feature / Flow	Item / Element	Current Behavior / Issue	Expected Behavior / Requirement	ADO Tasks (Link Relevant Tasks)	Sign-off Team (ENG, PM, LT)	Milestone #	Status & Build #	Notes
AUTH-DUPE-1	Create Account & Login	Footer auth links (“Already / Don’t have”) – copy & format	“Already have an account, Sign In” and “Don’t have an account? Sign Up” not consistently formatted; comma used; sizes may differ	Use **exact copy** with “an” and question mark:• “Already have an account? Sign In”• “Don’t have an account? Sign Up” Both lines must be same font, size, and style, and visually consistent between Create Account and Login screens					Applies to both Create Account/Complete Profile and Login
AUTH-DUPE-2	Create Account & Login	Footer auth links – alignment	“Sign In” / “Sign Up” alignment not consistent; may follow design gaps literally rather than aligning visually	Ensure **“Sign In” sits next to “Already have an account?”** and **“Sign Up” sits next to “Don’t have an account?”**; both pairs should line up cleanly.					Single implementation guideline used on both screens

				Use discretion for clean visual alignment, not copy any misalignment from design artifacts					
AUTH-DUPE-3	Create Account & Login (iOS)	iPhone 11 responsiveness	On smaller devices (iPhone 11), text and screens render much larger than on other devices; responsiveness unclear	Make Create Account/Complete Profile and Login screens **fully responsive** on iPhone 11: typography, spacing, and element sizes should be consistent with other target devices and match Figma scaling guidelines					Verify across multiple iPhone models,
AUTH-DUPE-4	Auth Emails (Sign Up / Forgot Password)	Email template branding & copy	Email templates still reference “pay”; verification copy not aligned	Update email templates to use **“Pal”** instead of “pay”. Include clear verification copy such as: “Someone sent a verification code to this email for xyz, if this is you enter …” (final text can be tweaked but must keep brand name “Pal”)					Applies to all auth-related emails (sign up, forgot password, OTP)
AUTH-DUPE-5	Forgot Password	Unknown email error handling	When user tries “Forgot password” with an email not in the system, no clear error is shown	Add explicit error message, e.g.: **“This didn’t work You can create a new account or check email address and**					Same rule can be reused wherever an email lookup fails in auth flows. What is logic?

				try again” when email doesn’t match an existing account					

5. Feed – Create Post

ID	Feature / Flow	Item / Element	Current Behavior / Issue	Expected Behavior / Requirement	ADO Tasks (Link Relevant Tasks)	Sign-off Team (ENG, PM, LT)	Milestone #	Status & Build #	Notes
FEED-1	Create Post	Background overlay	Create post screen blacks out background instead of tinting	Use tinted overlay so background remains slightly visible (as in design)					
FEED-2	Create Post	Toggle design	Toggle styling not matching Figma	Implement toggle per design (size, color, interaction)					
FEED-3	Create Post	Location dropdown	Location options not fully visible; scrolling unclear	Ensure dropdown shows all locations, supports scrolling clearly					
FEED-4	Create Post	Spotlight help tip	Tip/info for monthly spotlight missing	Add help icon with text explaining monthly spotlight “Eligible posts will be featured in the Monthly Spotlight for greater visibility.”					
FEED-5	Create Post	Neighborhood hint text	Current copy: “Tap to change your neighborhood”	Should be: **“Tap to select the relevant area”**					

FEED-6	Create Post	Category default selection	Category appears un-selected; unclear user action	No category selected by default; show hint (with icon) to select category select category hint area and icon (similar to others used in hint), “(icon) Select Post Category” Ux to make clear to user where category selection is					
FEED-7	Create Post	Category hint variation	Content and title default text does not update when changing category	Filler text must update per category (Gist, Ask, Discussion etc.) per design. Check hint text used in designs for each category.					
FEED-8	Create Post	Content constraints	Constraints from User Content Guidelines not implemented	Implement title/content length limits and other constraints; show appropriate error/hint					
FEED-9	Create Post	Max character error	No error message when exceeding max	Show specific error/hint when user exceeds max					
FEED-10	Create Post	API / error handling	“Internal server error” when creating post	Fix underlying API; display user-friendly error via toast					
FEED-11	Create Post	Layout on small devices	iPhone 11 / smaller devices look squeezed; Post	Improve responsive layout; ensure					

			button close to guidelines	comfortable spacing for all controls					
FEED-12	Create Post	Post creation navigation	After creating post, view not redirected	After successful creation, user should be taken directly to the new post; user's post should be first in view					
FEED-13	Create Post	Toast visibility with keyboard	Toast not visible when keyboard up; keypad can't be dismissed after title	Allow keyboard dismiss; ensure toast displays above keyboard or after dismissal					
FEED-14	Create Post	Delete post error feedback	No toast for failed delete	Show toast notification on failed post delete					
FEED-15	Create Post	Bottom hint copy	Currently "Select Neighborhood"	Should be "Select a Location"					
FEED-16	Create Post	Location list completeness	Dropdown does not contain all locations	Ensure full list or dynamic fetch for all supported locations					
FEED-17	Create Post	Location scroll behavior	Selecting locations changes form completely instead of scrollable dropdown	Use scrollable dropdown, keep user in context rather than changing entire page					
FEED-18	Create Post	Tap on Community Guidelines	Community guidelines is small pop up.	Link to Community guidelines in settings with pop up with ability to go back to create a post.					

6. Feed Page (Main Feed)

ID	Feature / Flow	Item / Element	Current Behavior / Issue	Expected Behavior / Requirement	ADO Tasks (Link Relevant Tasks)	Sign-off Team (ENG, PM, LT)	Milestone #	Status & Build #	Notes
FEED-18	Feed Page	Post width	Posts too narrow on large Android screens;	Posts should be wider with small white margins; responsive to device width					
FEED-19	Feed Page	Post outline	Outline darker than design	Match outline color/opacity to Figma					
FEED-20	Feed Page	Username area	Username not fitting properly, Using "…"	Adjust typography/spacing so usernames fit as in design					
FEED-21	Feed Page	Location & category layout	Location and category stacked vertically	Display location and category side by side					
FEED-22	Feed Page	Upvote/downvote style	Arrow icon fill colors differ from design	Use Figma arrow styles & colors					
FEED-23	Feed Page	Hot/Top ring & comment colors	Ring colors and comment colors mismatch design	Align ring and comment colors with Figma					
FEED-24	Feed Page	Profile images on posts	Profile images not showing correctly; ring incomplete	Ensure profile photos load; full ring around avatar where required					
FEED-25	Feed Page	Feed algorithms	Top/Hottest/New user boost not visibly working	Implement and expose feed rankings: top, hot, new user boost according to algo spec					
FEED-26	Feed Page	Feed-type toasts	No toasts like "You are in hot feed / top feed / new feed"	Show toast when switching feed type					
FEED-27	Feed Page	Vote count logic	Removing downvote does not increment count back;	Fix vote state machine: counts adjust correctly; selected arrow					

			selection highlight not persisting	stays highlighted					
FEED-28	Feed Page	Arrow icons	Arrows not same as design	Use Figma arrow assets					
FEED-29	Feed Page	Vote count color	Vote count color different from arrows	Use same color for count and arrows as design					
FEED-30	Feed Page	Pull-to-refresh behavior	Refresh indicator continues as user scrolls,	Standardize: indicator should show until refresh done or canceled/user scrolls; still reload, similar to instagram no confusing behavior					

7. Comments & Block

ID	Feature / Flow	Item / Element	Current Behavior / Issue	Expected Behavior / Requirement	ADO Tasks (Link Relevant Tasks)	Sign-off Team (ENG, PM, LT)	Milestone #	Status & Build #	Notes
CMT-1	Comments	Button label	Button text is “Post”	Text should be **“Reply”**					
CMT-2	Comments	Avatar initials fallback	Initials not shown when no profile picture	Use initials of username as avatar fallback					
CMT-3	Comments	Initials loading	Comments default initials slow; reply shows “T” incorrectly	Improve loading; ensure correct initials for each user					
CMT-4	Comments	Negative scores	Negative comments showing to all users	Negative values should only be visible to admin/mods as agreed					
BLK-1	Block	Block confirmation copy	Text not implemented	Use: “Are you sure you want to block [@username]? They won’t be able to interact with your posts. You					Need to confirm exception logic with

				also won't see their content. Exception: Platform-pinned posts remain visible to everyone."					backend
BLK-2	Block	Block success toast	Success message missing	Use: "You've blocked [@username]. You won't see each other's posts, except for official platform-pinned posts, which remain visible to all users."					Need to confirm exception logic with backend
BLK-3	Block	Unblock confirmation copy	Not implemented	Use: "Are you sure you want to unblock [@username]? They'll be able to see your posts and interact with you again."					Need to confirm blocking exception logic with backend
BLK-4	Block	Block behavior	Blocking did not work as expected	Ensure mutual block behavior: blocked users cannot see each other's posts, except TOP/hottest/platform-pinned as defined					
CMT-5	Comments	Reply context	No indication who user is replying to when nesting	Show "Replying to @username" or equivalent context for nested replies					

8. Nav Bar & Loading

8.1 Nav Bar

ID	Feature / Flow	Item / Element	Current Behavior / Issue	Expected Behavior / Requirement	ADO Tasks (Link Relevant Tasks)	Sign-off Team (ENG, PM, LT)	Milestone #	Status & Build #	Notes

NAV -1	Nav Bar	Icon centering	Icons (notifications, settings, etc.) not centered	Center icons vertically/horizontally per design					
NAV -2	Nav Bar	Notification badge	Red dot not correctly placed or showing count	Show badge with number of new notifications in correct position implement count notification page **NOTIF-1** below and in desing					

8.2 Loading Page

ID	Feature / Flow	Item / Element	Current Behavior / Issue	Expected Behavior / Requirement	ADO Tasks (Link Relevant Tasks)	Sign-off Team (ENG, PM, LT)	Milestone #	Status & Build #	Notes
LOAD -1	Loading Page	Performance	Loading appears often and is slow between pages	Optimize FE/BE so loading screens are minimal and fast					
LOAD -2	Loading Page	Animation behavior	Animation goes back and forth instead of “in and out”	Update animation to match design behavior					
LOAD -3	Loading Page	“Your everyday community” text	Text styling doesn’t have gradient/glare like design	Apply gradient/glare styling as per Figma					
LOAD -4	Loading Page	Logo size & clarity	Logo is larger than design; text smaller; may not be SVG	Use SVG logo, correct proportion; reduce size to match design					

9. Header

ID	Feature / Flow	Item / Element	Current Behavior / Issue	Expected Behavior / Requirement	ADO Tasks (Link Relevant Tasks)	Sign-off Team (ENG	Milestone #	Status & Build #	Notes

						, PM, LT)			
HDR -1	Header	Logo asset	Logo not same as Figma; full square instead of design	Use exact logo asset from Figma					
HDR -2	Header	“Welcome back, Pa” behavior	Text behavior not as desired; refresh loading overlaps	Keep “Welcome back, Pal”; ; ensure it disappears/reappears as user scrolls; refresh loading shouldn’t cover it					
HDR -3	Header	Logo drop shadow	Drop shadow missing	Add drop shadow per design					
HDR -4	Header	Category header behavior	Fixed header decision pending	Decide if category header is fixed while scrolling; implement final decision					
HDR -5	Header	“+ Post” spacing	“+ Post” too spaced apart	Adjust spacing to match Figma					

10. Spotlight Feed

ID	Feature / Flow	Item / Element	Current Behavior / Issue	Expected Behavior / Requirement	ADO Tasks (Link Relevant Tasks)	Sign-off Team (ENG, PM, LT)	Milestone #	Status & Build #	Notes
SPOT-1	Spotlight Feed	Deactivate toggle	“Click to Deactivate monthly spotlight” not working; arrow facing down	Arrow should face **right** when collapsed; toggle active on/off on click per design					
SPOT-2	Spotlight Feed	Spotlight post count	Number of posts for spotlight not shown	Display count of spotlight-related posts					

11. Report Post

ID	Feature / Flow	Item / Element	Current Behavior / Issue	Expected Behavior / Requirement	ADO Tasks (Link Relevant Tasks)	Sign-off Team (ENG, PM, LT)	Milestone #	Status & Build #	Notes
RPT-1	Report Post	Component size	Report dialog too large; hard to close	Make smaller or move to new page; add clear close					
RPT-2	Report Post	Flag icon	Flag too large	Reduce icon size to match design					
RPT-3	Report Post	Max character error	No error when max chars reached	Show max character error/hint					
RPT-4	Report Post	Toast notification	Toast not same as design	Implement toast per Figma					
RPT-5	Report Post	Bottom text copy	Text not same as design	Use: “Our moderation team will review this report as soon as possible. You’ll be notified if further action or input is required.”					

12. New Users & Others in Feed

12.1 New Users

ID	Feature / Flow	Item / Element	Current Behavior / Issue	Expected Behavior / Requirement	ADO Tasks (Link Relevant Tasks)	Sign-off Team (ENG, PM, LT)	Milestone #	Status & Build #	Notes
NU-1	New Users	Boost algorithm	New user boost not visible	Implement new user boost algorithm					

NU-2	New Users	Early adopters badge	First 100 badge not implemented	Add “Early Adopters (First 100)” badge					
NU-3	New Users	Start conversation post	Not implemented	Add “Start conversation” starter post for new users					
NU-4									

12.2 Others in Feed

ID	Feature / Flow	Item / Element	Current Behavior / Issue	Expected Behavior / Requirement	ADO Tasks (Link Relevant Tasks)	Sign-off Team (ENG, PM, LT)	Milestone #	Status & Build #	Notes
FEED-31	Global Navigation	Page-to-page loading	Slow, with loading screen often shown	Optimize FE/BE to reduce need for loading screens					
FEED-32	Session handling	App closes → user logged out; state not preserved	Closing app should not log user out; state preserved unless user logs out	AUTH-SESSION-PERSIST					
FEED-33	Login behavior	“Remember me” not working	Fix “Remember me” as per Login flow spec	(Reuse LOG-3)					
FEED-34	Toast notifications	Toasts not matching design	Standardize toast notifications for: Post success, Report submitted, In Hot feed, In Top feed, etc.	UI-TOAST-STANDARD					
FEED-35	Modal background tint	Some popups lack tinted background	Apply tint background where	UI-MODAL-TINT					

			design specifies						
FEED-36	App icon	SVG for app icon missing	Create and integrate app icon SVG	APP-ICON-SVG					
FEED-37	Voting highlight	Upvoting/downvoting not visibly highlighted	Ensure selected state is clearly highlighted for votes	FEED-VOTE-HIGHLIGHT					
FEED-38	Avatar initials	Initials not always shown when profile pic missing	Ensure initials fallback works everywhere (feed, comments, etc.)	AVATAR-INITIALS-GLOBAL					

13. Notifications

ID	Feature / Flow	Item / Element	Current Behavior / Issue	Expected Behavior / Requirement	ADO Tasks (Link Relevant Tasks)	Sign-off Team (ENG, PM, LT)	Milestone #	Status & Build #	Notes
NOTIF-1	Notifications	Count at top	No number of notifications shown	Show number of notifications at top, per design					
NOTIF-2	Notifications	Welcome message	Not implemented as specified	Use: “Welcome to Pal! Join the conversation, explore what’s new, and make your mark.”					
NOTIF-3	Notifications	Punctuation	Missing periods and punctuations in messages	Add periods and punctuations where needed for readability					
NOTIF-4	Notifications	Trending icons and other icons	Icons for Notifications not same as design	Align icons with Figma					

NOTIF -5	Notifications	Click behavior	Clicking notification doesn't deep link to post	Clicking should open the linked post directly					

14. Settings

14.1 Birthday

ID	Feature / Flow	Item / Element	Current Behavior / Issue	Expected Behavior / Requirement	ADO Tasks (Link Relevant Tasks)	Sign-off Team (ENG, PM, LT)	Milestone #	Status & Build #	Notes
SET -1	Settings – Birthday	Change frequency	No limit for how often user can update birthday	Define and enforce limit (e.g., X changes; audit trail of changes)					Confirm with backend if we need this
SET -2	Settings – Birthday	DB impact	Unclear DB write implications	Confirm impact of birthday changes on backend and any dependent features					Confirm with backend

14.2 View Posts Upvoted / Your Posts

ID	Feature / Flow	Item / Element	Current Behavior / Issue	Expected Behavior / Requirement	ADO Tasks (Link Relevant Tasks)	Sign-off Team (ENG, PM, LT)	Milestone #	Status & Build #	Notes
SET-3	View Posts Upvoted	Post outline	Darker than design	Match outline to main feed design					
SET-4	View Posts Upvoted	Back navigation	No clear back navigation	Add standard back navigation per design					
SET-5	View Posts Upvoted	Remove upvote behavior	Removing upvote doesn't remove post from list	Ensure removing upvote removes post from "Upvoted" view					

SET-6	Your Posts								
SET-7	Your Posts	Back navigation	No clear back navigation	Add standard back navigation per design					

14.3 Blocked Account

ID	Feature / Flow	Item / Element	Current Behavior / Issue	Expected Behavior / Requirement	ADO Tasks (Link Relevant Tasks)	Sign-off Team (ENG, PM, LT)	Milestone #	Status & Build #	Notes
SET-8	Blocked Account	UI	Not matching design	Align blocked accounts screen with Figma (layout, copy, icons)					

14.4 FAQ

ID	Feature / Flow	Item / Element	Current Behavior / Issue	Expected Behavior / Requirement	ADO Task	Sign-off Team	Milestone #	Status & Build #	Notes
SET-9	FAQ	FAQ content	Not updated to final version of copy/sections	Update to FAQ text and sections defined in design					

14.5 WOD (Wahala of the Day)

ID	Feature / Flow	Item / Element	Current Behavior / Issue	Expected Behavior / Requirement	ADO Task	Sign-off Team	Milestone #	Status & Build #	Notes
SET-10	WOD	Opt-in	WOD opt-in not reflected in settings	Add WOD opt-in/out toggle to settings					
SET-11	WOD	Duplicates	No rule for duplicate WOD posts	Enforce no duplication; WOD can only be a post made in that week					Confirm with backend

14.6 Other Settings

ID	Feature / Flow	Item / Element	Current Behavior / Issue	Expected Behavior / Requirement	ADO Task	Sign-off Team	Milestone #	Status & Build #	Notes
SET-12	Settings (global)	Back navigation	Some settings pages lack way back	Ensure all settings subpages have consistent “Back” behavior					
SET-13	Admin/Mods	Blocking and permissions	Admin/mod implementation not fully confirmed; block rules unclear Blocking with edgecases e.g. trending posts	Confirm behavior: cannot block admins/mods/reviewers; define any special visibility rules					Review logic with backend

15. Questions & Decision Items

ID	Topic	Question / Decision Needed	Suggested Owner	ADO Task / Decision Item	Notes
Q-1	OTP / Session	When user closes page after verifying OTP, what page should they return to on reopen?	PM / ENG		Tie to updatedflow (likely Feed or account info step)
Q-2	Icons	Why are similar but not identical icons used vs design?	ENG		Decide on icon set & enforce globally
Q-3	Hint & Error Messages	Do we have a master list of all hint/error messages?	PM		Needs central doc, versioned
Q-4	Rate Limiting	Should there be rate limiting for account creations?	PM / ENG / Security		Likely rolling 24 hours check
Q-5	Location Fields	Separate fields for state and country vs API restriction?	ENG / PM		Decide UX + data model
Q-6	“Remember me” logic	Exact logic for “Remember me” (duration, multi-device)?	PM / ENG		
Q-7	Post-verification routing	After verification in updated flow, does signup should go straight to feed with new user pop-up?	ENG		
Q-8	Sign-in precautions	Any sign-in precautions for MVP (e.g., new IP alerts)?	ENG		

Q-9	Feed algo testing	How do we test algorithms (top/hot/new/new user boost)?	ENG		
Q-10	Block rules	Should blocked users never see each other's posts except TOP/hottest/platform-pinned? Document for all app logic	ENG / PM		Clarify final behavior; Check if it contradicts Apple/Google Logic document
Q-11	Session persistence	Confirm rule: closing app should not log user out; session duration?	PM / ENG		
Q-12	Admin/Mods	Confirm Admin and mods implementation details (blocking, visibility, powers)	PM / ENG		Connect with SET-13
Q-13	Birthday changes	Restriction on changing birthday and backend writes/auditing	PM / ENG / Legal		Connect with SET-1 & SET-2
Q-14	WOD rules	WOD cannot duplicate; only posts from that week — final confirmation	PM / ENG		Connect with SET-11
Q-15	CI/CD	Any CI/CD errors contributing to stale builds or missing fixes?	ENG (DevOps)		
Q-16	Staging vs Main	Confirm: staging = daily; main = only when ready for prod	PM / ENG		
Q-17	Copy fallback	Confirm global rule: when in doubt, use text similar to Instagram/X and validate Create error, hints, copies used and needed in app document.	ENG/PM		Document

16. Next Steps

ID	Area	Next Step Item	Expected Outcome	Owner	ADO Task	Status & Build #	Notes
NS-1	Email	Update template email	All templates show "Pal"	PMM / ENG			

			instead of “pay” and have corrected copy And Kobi PY LTD				
NS-2	Loading Page	Review Loading Page (logo/text)	Logo smaller; “Your everyday community” text correct and styled	ENG			
NS-3	Auth Architecture	Create authenticated session before collecting info (verify email, avoid bots)	Easier to save/persist user progress; reduces bot signups	ENG			
NS-4	Auth UX	Log in user directly after creating account	User doesn’t have to log in again; smoother onboarding	ENG
